DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 5-15, 18-24 and 52-54 are allowed.

The following is an examiner's statement of reasons for allowance. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a method of atomic layer deposition (ALD) wherein a titanium precursor gas and a nitrogen containing reactant are utilized to form a titanium nitride* layer that fills an opening in a substrate thereby forming a titanium nitride plug, as recited in independent claims 1, 11, 12 and 52.

The titanium precursor gas utilized as recited in each of the independent claims is either $\text{Ti}\{\text{OCH}(\text{CH}_3)_2\}_4$ or tetrakis(diethylamido)titanium (TDEAT).

*(Applicant note: although independent claims 1, 11 and 12 recite a "metal nitride layer" and a "metal nitride plug", this can only be titanium nitride as noted above, since the only two metal precursor reactants recited contain titanium as the metal.)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
